

The Next Evolution After Generative AI

Bharattech
O R I G I N

Artificial Intelligence generates content. **Generative Intelligence** generates capabilities.

www.bharat-tech.org

Presented By: **Tushar Trivedi**

THE PROBLEM

Today's AI Systems Are Fundamentally Incomplete

Current AI generates content, but struggles to evolve intelligence.

01

Context Loss

AI gradually loses long-term objectives.

02

Static Learning

Learning stops after deployment.

03

Agent Fragmentation

Every workflow needs another agent.

04

Security Challenges

More intelligence creates more attack surfaces.

05

Intelligence Accessibility

Advanced AI remains inaccessible to many users.

THE SOLUTION

One Intelligence. Infinite Capabilities.

One intelligence system capable of solving multiple limitations simultaneously.
"Transforming AI from **content generation** to **capability** generation."

Intelligence For
Everyone

India Is Ready For The Next Phase Of Intelligence

The challenge is no longer internet access.
It is intelligence access.

958M+ Connected Population

India has one of the
world's largest
connected populations.

44% AI-Powered Interactions

Millions already interact
with AI-powered
experiences.

Next Growth Wave Tier 2 & Tier 3 India

The next phase of
intelligence adoption
will emerge beyond
metro cities.

\$6B+ Intelligence Economy

Demand for
intelligence-driven
systems continues
to accelerate.

Connected Population + AI-Powered Interactions + Emerging Markets = India's Intelligence Economy

THE PRODUCT

Gi-Rivinity: Curiosity Into Intelligence

A self-learning intelligence system that transforms curiosity into continuously evolving intelligence.

Why Gi-Rivinity Can Scale Differently

Five strategic pillars enabling scalable intelligence adoption and growth.

Enabling intelligence adoption where demand is growing faster than affordability.

MARKET SIZE

The Next Billion AI Users Will Come From **Accessibility**

Demand for intelligence is growing globally.
Affordability remains the barrier.

\$4.8T+

Global AI Economy

Projected AI market by 2033.

Source: UNCTAD (May 2024)

3B+

Monthly AI Interactions

Top Generative AI platforms receive billions of interactions globally.

Source: Similarweb (May 2024)

700M+

Emerging Market Internet Users

In regions where AI demand is growing faster than affordability.

Source: World Bank (2024)

1 South Asia
2.0B+ Population

- India
- Bangladesh
- Sri Lanka
- Nepal
- Pakistan

4 Latin America
650M+ Population

- Brazil
- Mexico
- Colombia
- Peru

3 Africa
1.5B+ Population

- Kenya
- Nigeria
- South Africa
- Tanzania
- Ghana

Initial Expansion Focus

Primary Region

- South Asia

Accessibility Opportunity

Secondary Region

- Southeast Asia

AI Adoption Growth

Focusing on **high-potential, affordability-sensitive markets** with rapid AI adoption growth.

AI demand is already global.

The next growth wave will be driven by accessibility.

Massive Underserved Market

High-Growth AI Adoption

Global Impact Potential

SOURCES

UNCTAD (May 2024)
AI market projected to reach \$4.8 trillion by 2033.
unctad.org

Similarweb (May 2024)
Top Generative AI platforms received ~3 billion monthly visits globally.

THE JOURNEY

The Journey of BharatTech Origin

From an idea to building India's sovereign intelligence infrastructure.

01

The Idea

Q4 2023

Identified the need for affordable, sovereign AI for Bharat and the world.

02

Research & Foundation

Q1 2024

Core research, architecture design, and building the foundational team.

03

Development Phase

Q2 – Q4 2024

Engine development, training pipeline, and internal testing & validation.

04

Alpha Release & Community

Q1 2025

Launched production alpha, onboarded contributors, and built an early community.

05

Scaling for Bharat & Beyond

Q2 2025 Onwards

Expanding infrastructure, global partnerships, and preparing for mass adoption.

Our Mission: To make advanced intelligence accessible to every Indian and every learner across the world.

THE ASK

WHAT WE NEED TO SCALE GENERATIVE INTELLIGENCE

Accelerating the journey from Production Alpha to global intelligence infrastructure.

01

Market Access

- Enterprise introductions
- Pilot deployments
- Strategic partnerships

Why it matters:

Real-world adoption accelerates intelligence evolution.

02

Government Connect

- Public sector opportunities
- Innovation programs
- Strategic collaborations

Why it matters:

Generative Intelligence has applications across education, governance, and public infrastructure.

03

Business Mentorship

- Go-to-market strategy
- Commercialization
- Global scaling guidance

Why it matters:

Building intelligence and scaling a company require different capabilities.

04

Strategic Partnerships

- Universities
- Research institutions
- Industry collaborators

Why it matters:

Accelerates innovation, validation, and ecosystem growth.

05

Investor Readiness

- Fundraising strategy
- Investor introductions
- Scale planning

Why it matters:

Preparing for future expansion and category leadership.

We are not seeking resources to build.

We are seeking the ecosystem required to scale **Generative Intelligence** globally.

THANK YOU

Bharattech
